Brentwood, CA, 94513

Reglazing is a cost-effective way to renew old items like bathtubs, sinks, and tiles. To extend the lifespan and keep them looking new, follow these dos and don'ts to maintain your reglaze for years to come.

DOs:

1. Clean your reglazed items regularly with a mild, non-abrasive cleaner.
2. Use a soft cloth or sponge to clean your reglazed items. Avoid using abrasive scrubbers or steel wool, as they can scratch the surface of the reglazed item.
3. Dry your reglazed items after each use, especially in areas with hard water. Hard water can cause mineral buildup on the surface of the reglazed item.

DON'Ts:

1. Do not use harsh chemicals or cleaners on your reglazed items. Acidic or abrasive cleaners can damage the surface of the reglazed item.
2. Do not use bath oils or bubble baths in the bathtub. These products can leave a residue on the surface of the reglazed item and cause discoloration.
3. Do not use suction cup mats or decals on the surface of the reglazed item. These products can damage the surface of the reglazed item and void the warranty.

By following these dos and don'ts, you can ensure that your reglazed items stay looking new for years to come. Proper maintenance is the key to extending the lifespan of your reglazed items and getting the most out of your investment.
